

uScope classroom kit

Are you looking to equip your classroom with everything you need to teach digital storage oscilloscopes? We have the solution for you. A complete classroom set with a uScope master kit for you the instructor as well as a signal distribution harness and ten uScopes for your students! This proven combination is in use at numerous schools around the world.

**EDUCATIONAL
ADVANTAGES**

- The instructors master kit has all necessary components for teaching.
- The signal distribution facilitates sharing signals from a ConsuLab product to the whole class.
- The (10) included uScopes for students provide hands-on experience for everyone.
- The uScope has internal preset stored sample patterns for sensors, actuators, amp, ignition and charging system patterns for student reference. Patterns can be over-layed with live pattern for comparisons.
- The uScope has a built in 10Hz-1MHz square wave signal generator for student learning and practice. The signal is manually adjustable for duty cycle and frequency.
- Obtained waveforms can be saved and stored on a computer for future recall and instruction

KIT CONTENT

- (1) AE-71-MK_053280 uScope digital storage oscilloscope - master kit
- (1) AE-72-SD_053281 Signal distribution harness
- (10) AE-70-BK_053279 uScope digital storage oscilloscope - basic kit
